

MigrationMounting Template

Directions for using this template:

1. Start at the location for the top hole # 1 on the diagram.
2. Use a level or a weighted string to determine a true vertical line descending from that point.
3. Measure vertically down that line to point #2 and #4
4. Use a level or a square to establish a horizontal line at those points.
5. Measure along that line to points 3 and 5.
6. Temporarily install the sculpture using points 1, 3 and 5. Mark the other mounting holes with the sculpture in place. See the note to the right about point 6.
7. Remove the sculpture. Install the appropriate anchors and permanently remount the sculpture on the wall.

Point 6 is approximate.
I determined this per individual sculpture.
Attach the top part using just 1 screw in the top hole (#1) and then attach the sculpture.
Wind 1 turn and test.
Push the bottom of the upper disk to the right or left about 1/2" and test to obtain proper operation.
Once it is operating properly screw the 2 lower screws into place.
